

Hallowed Homecoming: A Samhain Retreat

SPECIAL COVID-19 ANNOUNCEMENT FOR HHSR 2024

While the staff of Hallowed Homecoming recommend current vaccinations and boosters, they are not required in order to attend the event as they do not prevent transmission of COVID risks to the community, but do reduce the probability of individual cases requiring acute care. Attendees are encouraged to use N-95 or other equivalent masks as desired for their personal protection. Masks will not be provided by staff and wearing of masks is not required, unless directed by medical staff.

By registering, all event attendees acknowledge that:

- Virus spreading at large gatherings is inevitable to some degree, and thus accept potential exposure as an informed decision;
- If an attendee exhibits signs and symptoms of COVID on site, confirmed by medical staff, such attendees must wear a mask and have a COVID test performed (provided by medical staff). Failure to wear a mask or be tested will result in staff asking the attendee to leave the site. If an attendee tests positive for COVID with corresponding signs and symptoms they will be required to leave the event, but may be eligible for up to a full registration for the following year's event.
